

Open eBooks

Open eBooks was launched February 24 to make thousands of award-winning and popular electronic books available to low-income K-12 students and families. Students qualify if the school is Title 1 eligible or receives Title 1 funds, or if 70% or more of students are on free or reduced lunch. If your school qualifies or if you are unsure, please share this information with administrators and staff to determine how to take advantage of this opportunity. Get started, register, and qualifying: <http://openebooks.net/getstarted.html>.

Access is via an [app available for download](#). Educators, including librarians, in schools with 70% or more of students in need may [register](#) to receive codes, PINs, and a letter to share with students' families. Once set up, students access the eBooks via the app on their personal or parents' smartphone or tablet or via school or library-loaned devices. The registration requires knowledge of current free/reduced lunch rates in the school.

See this [press release](#) for an overview of how the program works, or browse the [FAQ](#). To stay in the loop, you can [follow](#) Open eBooks on social media and sign up for a mailing list. Partners in this initiative are Digital Public Library of America, First Book, and The New York Public Library, with content support from Baker & Taylor. A variety of publishers have generously submitted their full catalog or a selection of titles.
