5th Congressional District, Colorado Springs

Dwight D. Jones, Commissioner of Education
Secretary to the State Board of Education

Introduction

The Colorado Department of Education (CDE) is pleased to present to its constituents the 2007 No Child Left Behind Report Card. This report card details the progress Colorado and its districts and schools are making in reaching the goals of the federal *No Child Left Behind Act (NCLB)*.

Public reporting is a key component of NCLB. Only when information and data become public, do they become a catalyst for change. The intent of the NCLB Report Card is to inform parents, teachers, the general public, key policy-makers and other decision makers about the status of education in Colorado in relation to NCLB goals.

Two of the major goals outlined in *No Child Left Behind* are:

- 100% of all students proficient in reading and math by 2013–2014
- 100% Highly Qualified Teachers by 2005–2006

Specifically, the report includes:

- Assessment Data—the results of the reading and math state content assessments (CSAP, CSAPA and Spanish Lectura)
- Accountability Data—the Adequate Yearly Progress (AYP) results for the state
- Graduation Rate Data
- Federal accountability status of individual school districts in the state
- Improvement status of Title I schools in the state
- Information about teacher qualifications and percentages of classes taught by highly qualified teachers

This year's report card will also allow parents, school/districts staff and the general public to easily access Adequate Yearly Progress and highly qualified teacher data for an individual school or a district on the CDE website at: <http://www.cde.state.co.us/scriptscfpu/NCLBProfiles0708/index.asp>.

Please visit this site and send us feedback on other data to include that you believe would be helpful.

Some highlights from this year's report include:

- The state is seeing significant gains in math at the middle level for Black, Hispanic, English language learners, and economically disadvantaged students. Additionally, gains are occurring in reading at the high school level for Hispanic, English language learners, economically disadvantaged students and students with disabilities.
- Over ninety-eight percent of core academic classes are being taught by highly qualified teachers. The state is ensuring that districts have a plan to get the remaining less than two percent highly qualified.
- Sixty-four districts have been identified for Program Improvement or Corrective Action status.
- Twelve Title I schools have made AYP for two consecutive years and have been removed from the School Improvement list.

If you have questions about an individual school or district, I encourage you to contact the applicable school or district administrative office. Additionally, all districts in the state create an Annual Report to the Public, which contains more information about how the specific district and schools are succeeding.

The Colorado Department of Education thanks you for your interest in the education of our state's students. Working together, we can provide an educational environment where no child will be left behind.

William Windler, *Assistant Commissioner*
Office of Special Services
Colorado Department of Education

Assessment Data

Assessment Data

Every year the state of Colorado administers the Colorado Student Assessment Program (CSAP) to measure the progress students are making in achieving proficiency in Colorado's Content Standards. The CSAP assesses third through tenth grade students in reading, writing and mathematics. Additionally, science content standards are measured in fifth, eighth and tenth grade. The complete reports of CSAP results can be found at: www.cde.state.co.us/cdeassess/documents/csap/csap_summary.html.

Students with significant cognitive disabilities (about 1% of the student population) may be eligible to take the CSAP Alternate (CSAPA), which assess students in modified state content standards. CSAPA results are included in the reports on the following pages. CSAPA data can also be found at: www.cde.state.co.us/cdesped/CSAPA_Reports.asp.

The following graphs represent the percentage of students scoring advanced, proficient, partially proficient, unsatisfactory, and no score on the CSAP and CSAPA. Tests may receive a "No Score" if a student does not take the test, or does not complete the test. Each graph shows a specific grade level and subject area.

The data is disaggregated for race/ethnicity, English language learners, students eligible for free or reduced lunch, students with disabilities, gender, and migrant status.

Accountability Data

Accountability Data

The No Child Left Behind Act requires the Colorado Department of Education to determine if school districts make Adequate Yearly Progress (AYP) every year. Districts, in turn, are required to make AYP determinations for their schools. The state as a whole must also calculate AYP.

To make AYP the school/ district/ state must:

1. Meet the 95% participation requirement (95% of students enrolled in the school must be assessed with the CSAP or CSAPA).
2. Meet the math and reading performance targets, or decrease the percent of students scoring non-proficient by 10% from the prior year. The targets are set state wide and vary by elementary, middle and high school level and content area. Additionally, targets increase every three years in order to meet the goal of 100% of students proficient in 2013–2014. Targets last increased during for the 2004–2005 calculations and will increase again in 2007–2008.
3. Meet the other indicator requirement, which is 1.10% of students scoring at the advanced level on reading and math at the elementary and middle school level. At the high school level the school must meet the graduation rate target, 57.40%.

These targets must be made for all applicable disaggregated groups. Possible disaggregated groups include: all students, White, Hispanic, Black, Asian/Pacific Islander, American Indian/Alaskan Native, English language learners, economically disadvantaged students, and students with disabilities. The state must also report scores for male, female, and migrant students.

AYP data is based on CSAP, Lectura, CSAPA, and graduation rate data. Scores from all those assessments are aggregated in AYP calculations.

The following tables and graphs reflect Colorado's State Adequate Yearly Progress (AYP) data. Individual school and district AYP results can be found at: www.cde.state.co.us/scripts/cfpu/NCLBProfiles0708/index.asp.

Colorado did not make AYP as a state for the 2006–2007 school year. In 2006–2007, the state was responsible for 153 targets; Colorado made 119 of those targets (represented by the light orange cells). Colorado did not make 26 targets (represented by the gray cells). Colorado used the safe harbor provision (a 10% reduction in the percent of students scoring non-proficient from the previous year) to make an additional 8 targets. In 2006–2007 Colorado made 83% of its targets, the same percent as in 2005–2006.

The tables on pages 43–45 show the specific targets the state was accountable for and the performance on each. Male, female, and migrant students are included on these tables for reporting purposes only.

The graphs on pages 46–51 show the performance data, for reading and math, by disaggregated group. The black line represents the 2006–2007 AYP performance target; the grey line represents the 2003–2004 target. Any disaggregated group whose performance falls below the black line, did not make the 2006–2007 AYP performance target. However, eight of those disaggregated groups did make the safe harbor provision. Current data (2007) is compared with data from 2002, 2003, 2004, 2005 and 2006 to show the trend in performance over time.

Class of 2006 Graduation Data

The graduation rate for the Class of 2006 was 74.1 percent. This is a 6 percentage point decrease from the Class of 2005 rate of 80.1 percent and an 8.4 percentage point decrease over the Class of 2004 rate of 82.5 percent.

Graduation Rate Notes

1) Much of the 6 percentage point decline in the state graduation rate can be attributed to a piece of legislation approved in 2005: Senate Bill 05-091. The administrative rules supporting this bill, known as CCR 301-67—“Rules for the Administration of Colorado Data Reporting for School Accreditation,” changed the way the state counts students who leave a Colorado school district to pursue a GED (General Educational Development) certificate. Previously, students bound for a GED program were treated as transfers and did not affect the graduation rate calculation. Under the new formula, students who opt for a GED program remain in the “membership base” (or graduation rate denominator) and thereby reduce the graduation rate for their graduating class. This legislative change accounts for 4.9 percentage points of the 6 percentage point decline in the state graduation rate.

2) Another provision of the 2005 administrative rules requires Colorado’s school districts to obtain adequate documentation of transfer for all students who transfer from the district to attend a school outside the state or country, a private school, or a home-based education program. Adequate documentation is defined as an official request for academic records from the student’s new school or, in the case of a home-based education program, a signed form from a parent or legal guardian. If the district cannot obtain this documentation, the student must be reported as a dropout. The quantitative effect of this provision on the graduation rate cannot be calculated precisely. However, by applying a conservative estimate that ten percent of all twelfth graders reported as dropouts in the 2005–2006 school year would have been counted as transfers rather than dropouts under the old methodology,

the state graduation rate would increase by 0.7 percentage points. Districts serving highly mobile student populations were potentially affected by this provision to a much greater degree.

3) 2005–2006 was the third year the Colorado Department of Education collected Student End of Year data for each individual student using the State Assigned Student Identifier (SASID) system. Tracking students individually rather than in aggregate allows a more accurate accounting of students’ progress through the public education system than was possible under the old data collection method (prior to 2002–2003). The Colorado Department of Education expects this gradual decline in the graduation rate that began in the 2003–2004 year to continue over the next year then level off after the class of 2007 graduates. The graduating class of 2007 will be the first group of students to graduate after being tracked individually (via SASIDs) during all four years of high school (9th–12th grades).

Questions and Answers About Colorado Graduation Rates

Who is Counted as a Graduate? There is no statewide definition. In Colorado, local school boards are responsible for establishing the requirements for high school graduation. A graduate is a student who has met the requirements for the locally defined high school diploma.

Do All Colorado School Districts Have the Same Requirements For Graduation? No. Each local school board defines graduation requirements for its district. These vary from district to district. The state considers a graduate to be any student who has met the graduation requirements of his or her local school district.

Are There Students Who Complete 12 Years of School and Do Not Graduate? Yes. Some districts award certificates or other designations of high school completion or attendance to students who do not complete the standard high school graduation requirements. Also, some students who do not complete the traditional high school graduation requirements do successfully achieve a general educational development certificate (GED).

Under what Circumstances is a Student Reported as a Transfer? A 'transfer' is, for the purposes of the graduation rate and the completer rate a student who enrolls in another school that awards diplomas or a home-based education program (home school) pursuant to 22-33-104.5. It does not include students who enroll in a GED program.

What Is the Graduation Rate? The graduation rate is a cumulative or longitudinal rate which calculates the number of students who actually graduate as a percent of those who were in membership over a four-year period (i.e., from Grades 9–12) and could have graduated with the current graduating class.

A graduation rate is reported for each graduating class (i.e., the Class of 2006). The rate is calculated by dividing the number of graduates by the membership base. The membership base is derived from the number students entering ninth grade four years earlier (i.e., during the 2002–2003 year), and adjusted for students who have transferred into or out of the district during the years covering grades 9 through 12.

The Graduation Rate Calculation:

$$\frac{\text{Number of students receiving a regular diploma during the 2005–2006 school year}}{(\text{Number of students beginning 9}^{\text{th}} \text{ grade in 2002–2003}) + (\text{Number of transfers in}) - (\text{Number of verified transfers out})}$$

What Is Meant By the “Class of 2006”? Graduation rates and completer rates will be reported for a particular class. The Class of 2006 includes students who graduated during the 2005–2006 academic year. It may include students who completed high school in three years, four years, or longer.

What Happens to Students Who Graduate in the Summer? Summer graduates are included in the graduation rate calculation of the current graduating class—provided they receive a diploma before August 31 of the reported school year.

If a Student Was Reported as a Dropout at Some Point During His or Her High School Years and the School Subsequently Receives Information that the Student Transferred into Another Educational Program, Does That Student Affect the Graduation Rate For the Class of Which He/She Was Originally a Member? No. If the high school has documentation of the student’s transfer into another educational program or completion of an educational program, then an adjustment may be made to the membership base used to calculate the graduation rate. These students are not reported as completers from the district, they are taken out of the membership base of the school and treated as if they transferred from the school. However, the dropout rate for the year in which they were reported as a dropout remains unchanged.

What Is the Completion Rate? The Completion Rate is also a cumulative or longitudinal rate which reflects the number of students who graduate, receive a GED certificate, or receive a certificate or other designation of high school completion. Like the graduation rate, the completion rate is calculated as a percent of those who were in membership and could have graduated or completed over a four-year period (i.e., from Grades 9–12).

Additional graduation rate and completer rate data can be found at: <http://www.cde.state.co.us/cdereval/rv2006GradLinks.htm>.

Migrant	268	82.70%	359	70.5

District Results

Districts are required to make Adequate Yearly Progress (AYP) in reading and math, as is the state and schools. One hundred four districts (57% of the 184 districts in the state) made all of their AYP targets for the 2006–2007 school year. 90% of districts made more than 90% of the AYP targets. In 2005–2006, 61% of districts made AYP.

How can districts have a different number of targets?

The targets a district is accountable for is based on the number of students in a disaggregated group. If there are less than thirty students in a disaggregated group, for two consecutive years, the district is not held accountable for that target. Thus, smaller, rural districts tend to have fewer targets than large, urban districts.

The following table shows all districts in the state, whether or not the district made AYP, the number of targets they met, the number of targets they were required to meet, the percent of targets met, and the district's Program Improvement Status. Districts are placed on Improvement if they do not make AYP in the same content area, at the same level (elementary, middle, high), for two consecutive years. While most districts are on Improvement for both reading and math, there are a few districts that have only missed targets in one content area.

To see detailed district reports which show exactly which targets the district missed, please go to the CDE website at: <http://www.cde.state.co.us/scripts/cfpu/NCLBProfiles0708/index.asp>.

School Improvement Data

Title I schools that do not make AYP targets in the same content area for two consecutive years are identified for Title I School Improvement. Schools are placed on Improvement in reading, math, or both depending upon their AYP status. Schools are removed from School Improvement when they make AYP for two consecutive years in the content area(s) that placed them on Improvement. Twelve Title I schools made AYP for a second year and are no longer on School Improvement! Those schools are listed on the next page.

Thirty one Title I schools are on School Improvement—Year 1. These schools need to create a School Improvement Plan and the district must offer transportation for Public School Choice. Twenty six schools are on School Improvement—Year 2. In addition to the first year sanctions, they must also offer Supplemental Services to students. If, after two years of undergoing school improvement, implementing a school improvement plan, and receiving extensive technical assistance, a school still does not make adequate yearly progress, the school district must identify the school for Corrective Action. Identifying a school for Corrective Action signals the district's intention to take greater control of the school's management and to have a more direct hand in its decision-making. The district must continue to offer Public School Choice and Supplemental Services. Colorado has twenty five schools on Corrective Action. If AYP still is not made, the Restructuring–Planning year requires the LEA to prepare a restructuring plan to implement **at least one** of the following actions;

1. Replace all or most of the school staff, which may include the principal, who are relevant to the school's inability to make adequate progress;
2. Enter into a contract with an entity, such as a private management company, with a demonstrated record of effectiveness, to operate the school as a public school;
3. Turn the operation of the school over to the SEA if this action is permitted under state law and the State agrees;

4. Re-open the school as a public charter school; or
5. Implement any other major restructuring of the school's governance that is consistent with the principles of restructuring.

If, in the following year improvement still is not made, then the Restructuring plan must be implemented. Thirteen Colorado schools are in the Restructuring–Planning year, and twenty seven schools are in the Restructuring–Implementation year.

Additionally, all schools on Improvement are eligible to receive the Title I School Improvement Grant. The Title I School Improvement Grant is an opportunity for any Title I school on NCLB School Improvement to receive the following:

1. A School Support Team (SST) review of the school.
2. A first-year grant to help with the analysis of the SST report and planning for school improvement. (\$50,000)
3. A second year grant for implementation of the recommendations in the SST Report. (\$100,000)

Each school is eligible to receive up to \$150,000 over a two-year period. This is not a competitive grant however funds are limited and schools will be served on a first come first served basis. At this time, all schools that have requested the grant process have received it. Schools involved with the grant are marked with an asterisk (*) on the following pages.

The following pages list the schools on Improvement.

For more information about the improvement process, please visit the CDE website at: www.cde.state.co.us/FedPrograms/improvement/schimp.asp.

You can look up detailed AYP results for schools on the CDE website at: www.cde.state.co.us/scriptscfpu/NCLBProfiles0708/index.asp.

Code Key: SI# = School Improvement Year #; CA = Corrective Action; RP = Restructuring–Planning; RI = Restructuring–Implementation

* Schools have volunteered to participate in School Improvement Grant in which they receive a comprehensive school support team review and up to \$150,000 for improvement efforts. More information can be found at http://www.cde.state.co.us/FedPrograms/improvement/schimp_tia.asp.

Highly Qualified Teacher Data

Highly Qualified Teacher Data

NCLB requires that all teachers teaching in core academic subjects must be highly qualified no later than the end of the 2005–06 school year. The core academic subject areas are defined as English, reading or language arts, mathematics, science, foreign languages, civics and government, economics, arts, history, and geography. In general, in order to be considered highly qualified, teachers must hold at least a bachelor’s degree and have demonstrated subject knowledge. The following data shows the current status of highly qualified teachers and classrooms in Colorado. If you would like more information about Colorado’s definition of a highly qualified teacher, go to:

www.cde.state.co.us/FedPrograms/nclb/tiia.asp.

School Type	Total Number of Core Academic Classics	Number of Core Academic Classes Taught by Highly Qualified Teachers	Percentage of Core Academic Classes Taught by Highly Qualified Teachers
All Schools in State	217,638	213,608	98.1
Elementary Level			
High Poverty Schools	38,439	37,802	98.3
Low Poverty Schools	41,348	40,637	98.3
All Elementary Schools	138,123	135,761	98.3
Secondary Level			
High Poverty Schools	15,739	15,189	96.5
Low Poverty Schools	39,076	38,228	97.8
All Secondary Schools	108,512	105,519	97.2

Districts’ individual percentages of highly qualified teachers can be found on the NCLB District Profile pages at: www.cde.state.co.us/scriptscfpu/NCLBProfiles0708/index.asp.

Educational Level of Teachers in Colorado

Part of the requirement for being a Highly Qualified teacher includes holding, at minimum a bachelor’s degree. The following table shows the educational level of teachers in Colorado.

Professional Qualifications of All Public Elementary and Secondary School Teachers in the State	Bachelors Degree	Post Bachelors (First Professional Degree)	Masters Degree	Specialists Degree	Ph.D./Ed.D
Number of Teachers	23,916	92	23,887	101	379

Certification of Teachers in Colorado

Teachers may either hold a professional or provisional license to be Highly Qualified in Colorado. Teachers with an alternative license can be Highly Qualified for the two years in which they can hold the license.

Certification	Number of Core Academic Public School Elementary and Secondary Teachers	Percent of Teachers
Emergency License	116	0.32%
Provisional License	6,439	17.52%
Professional License	28,391	77.24%
Alternative License	669	1.82%
