CDE Lead Consultant: Jozette Martinez

The PEAK Learning Center offers invited students in grades 2-5 a comprehensive out-of-school time experience. Each elementary site receiving CO-AAP funding offers dynamic programming incorporating a mix of hands-on STEM activities, robotics, and social-emotional support. Additional academic program components include Imagine Math, ST Math and Everyday Math games. Monthly family engagement events are hosted featuring a variety of topics to support attendance and math identity.

Adams County 14

Lester Arnold High School

Contact: Joseph Hermocillo
CDE Lead Consultant: Jozette Martinez

Adams 14 is excited to implement a robust CO-AAP grant during out-of-school time, focusing on transitions from elementary to middle and middle to high school at four locations in the Commerce City area. Through STEM enrichment, High-Impact tutoring, family engagement and engaging digital math strategies we feel confident to surpass our goals. High-quality STEM education programs take an integrated approach, teaching science, technology, engineering and math as interwoven subject areas. We plan to provide research backed, hands-on, real-world experiences that not only allow for deeper, more meaningful learning but also provide students with the opportunity to both better identify and begin their journey down a career path.

Adams-Arapahoe 28J
APS Mosley P-8

Contact: Ismael Robles
CDE Lead Consultant: Rachel Messersmith

Aurora Public Schools (APS) will accomplish our CO-AAP goals by utilizing licensed teaching staff to oversee students as they work online through a digital math accelerator program called ST Math, twice per week. Students will spend two additional days per week with accredited STEM providers in the community (Little Medical School and Brains and Motion Education) where they will focus on hands-on, project based learning to improve students' essential skills in STEM. Family Math Nights and Math Weeks will occur periodically throughout the school year. Students will also take part in a two-week intensive STEM-based summer camp where they will bring creative ideas to life at Camp Invention.

ABOUT US...

Axis International Academy
Axis Int. Academy

AXIS International Academy is a charter school offering a multilingual education to children in preschool through sixth grade. At AXIS, we are committed to enhancing STEM education for students and their families through three core out-of-school time programs: afterschool math labs, summer STEM camps, and bilingual family STEM nights. Each program is designed using evidence-informed practices to ensure impactful learning experiences that meet the needs of our students and their families.

BOYS & GIRLS CLUBS
METRO DENVER

Boys & Girls Club Denver
Johnson Elementary

Boys & Girls Clubs of Metro Denver approaches the CO-AAP grant with excitement by providing STEM programming, math tutoring and parental engagement in their students' math and science skill building. With CO-APP we expect to elevate and enhance our academic and STEM programs to increase members' love for Math and Science and support them achieving academic success. In partnership with a DPS School, Johnson Elementary, we are utilizing a tutoring program to provide intentional and strategic interventions for students. We are looking to see growth in all our members during the school day and on state assessments, so that all members may be able to fulfill their greatest potential.

Estes Park R-3
Estes Park Elementary

Contact: Ruby Bode
CDE Lead Consultant: Rachel Messersmith

Estes Park School District R-3 (EPSD) we envision excellent educational experiences for every student, every day. Our mission is to engage all learners in authentic learning with a global application. We offer a comprehensive range of high-quality educational programs, including PK-12 education, innovative technology, career technical education, and restorative practices, as well as several concurrent and post-secondary options. Regarding the COAAP grant, our goal is to provide every child in the Boys & Girls Club with engaging activities in STEM, computer science, and math, extending beyond classroom learning. We believe these enriching opportunities will prepare students for future jobs in the innovative landscape of our economy and make them competitive graduates of our school district.

Contact: Vonnie Davis
CDE Lead Consultant: Rachel Messersmith

The goal of the **Eureka** McConnell Science Museum is to provide a fun and engaging after school program that is a safe, educational, and fun environment for kids to go after the school day ends. We provide math tutoring and science enrichment to students in the hopes of growing their knowledge and confidence in academic areas, while engaging them in fun ways to learn, that support the things they learn during the school day, and extending that time to build upon their successes. We also focus on teaching teamwork, and our staff work tirelessly to build positive relationships with student, parents, and caregivers. To accommodate basic needs beyond learning we encourage a healthy lifestyle by providing healthful snacks and setting aside time for physical activity.
