

Accessing the Dashboard: UIP Review Feedback for District Users

Overview

The School Improvement and Planning team has created a dashboard within the UIP Online System for district level users to view UIP feedback. This feature will be most useful for districts with multiple schools receiving feedback. The UIP Review Feedback for District Users dashboard is available now.

Accessing the Dashboard

To access a district summary of feedback in the UIP Online system, select the “Feedback on UIPs” tab. The dashboard provides summary information; “View Report” can be selected at the bottom of any component to view, export, or print more detailed feedback reports.

UIP Feedback: By UIP Section (e.g., Data Analysis and PPCs; Root Causes)

To export a report from the “View Report” screen, click on the arrow in the upper right corner and select “Export.”

Authorized Representatives

District staff responsible for ESEA programs can connect with online UIP district level administrators to access feedback for Comprehensive Support (CS) identified schools, as program feedback is consolidated in one feedback form. Feedback on CS requirements is available through the report available on the dashboard. If you need support identifying staff with those permissions in your district, please contact uiphelp@cde.state.co.us.

Specifically, the report “Feedback on CS Requirements” within the dashboard may be most useful. For additional context, the report “UIP Feedback: by UIP Section” may provide a broader understanding of overall feedback for the plan.

School Level Feedback

School specific feedback across all sections and requirements is available through the school level plan, Collaboration tab, and UIP Feedback. This feedback form can also be downloaded for storing and sharing.
